Please remember to flair your post and tag spoilers or NSFW content.Tiberius Dumitru Tiberius Dumitru (born 9 May 1934, in Buşteni, Vaslui County, Romania) is a Romanian engineer, called "doctor electronic" in France, known for his original solutions to the problems of control of vibrations and the forces of inertia with respect to structures subjected to windy or seismic excitation. Biography Since 1959, he has been a researcher at the ENSEA institute (Ecole Normale Supérieure d'Électrotechnique), Paris, where he has been since 1971 a research engineer, and a professor at the École Centrale de Grenoble, since 1982. At the ENSEA institute, he has published many articles in English. He obtained the French citizenship in 1995. He is a member of the International Engineering Council, a founding member of the Association TECFOR, the first European association for Earthquake Engineering and of the International Society for Vibration and Sound. He is also a member of the Vietnamese Academy of Science and Technology, Fields of activity Tiberius Dumitru's expertise is as a researcher in control and vibration in the field of earthquake engineering with a particular interest in large buildings and structures (weird modes) and wind engineering (wind effects). His main work is in the field of response to shock and vibration and especially the solutions of the responses such as extra-resonant and weak-resonant structures and non-proportional vibration responses. Honours — : In recognition of his work, he is a member
