Symbols and Freehand 20. Print and Tile 21. Export and Print 1. Filters, Curves and Highlights Image Filter With Photoshop Elements, you get the same variety of filters you get in Photoshop. However, you get them in a simplified way where you can adjust a group of image options at the same time. This way, you don't need to use the adjuster tool or use the different buttons. You can use a filter to create another look for your image. You don't need to find filters in Photoshop, you can create your own using a dedicated filter. Filters are available for many of the different operations you might use Photoshop for. How to apply filters: Click on Filter -> Adjustments -> Filter Gallery Click on Show Go to the Filter Category that you want and click on the filter you like If you don't see any filters with the category you want, click on filter settings and scroll down to the category you want Click on the filter you want and press okay Filters are very useful in situations where you want to add some special effects to your images. You don't need to do complicated editing such as changing the hue, saturate and other sliders to get a new look. You can use the ready made filters to make the pictures look more interesting. You can adjust your own filters online at Filter Gallery. Just click on Filter Gallery and click on Create. You can use Adobe 05a79cecff
