This is the beginning of a series of adventures. Be part of the project; get involved. Help us create a fantastic game world. Your participation will help us make the worlds and characters we create even better. This game is designed for Fantasy Grounds. The downloadable file contains everything you need to play the game on your personal computer. Bonus Content Available in an Expansion Pack: There's a lot to explore in here, but not much you can do with it without having the Expansion. Here's a small list of things you can do: You can open the houses to see what's inside, but only if there is at least one Adventurer in your game You can take the items and sell them as ingots You can track the players and see what treasure they looted. You can increase the length of your adventure to hours instead of days Both House and the adventure have been made in high resolution and can be seen in the screenshots. Installation: Download the zip file and extract it. Now start Fantasy Grounds and import the downloaded data. Hut Where do you

start when you want to create a new adventure? First you have to make a house. If you look on my website, there's a document where I've described how to do this. But this is how: Select the "Create House" option from the right side menu. Select the "Base Styled House" template. Select all you need from the left side menu. Do not worry about category icons, just select anything that you want. Click OK Now you can start creating rooms and contents. You can add or delete rooms and contents. When you have the house ready, close the house to make it in sync with your FG account. When you want to make changes to the house, open it and you will be able to see your changes.

Adventure: Where are you going when you get the idea to make an adventure? Create the adventure first. In the "Root Game" area, there is an area called "Library", where you can see and create new adventures. If you see a new icon in the root game area (it will be a little cross), create a new adventure. Now you have to select an adventure and let Fantasy Grounds create the necessary things. There is a few things that are needed, such as a quest system and character sheets. A Quest A quest is the central

In the Ice Age, a powerful dragon cast a powerful enchanting over the forest and swamp; causing almost all the animals to flee to safer place and turning the landscape into a vast labyrinth of swamps and deadly forests. Now, on the shores of the ancient lake, a tribe of half-blood hags live, who bless all with their influence of magic and greed, wishing for peace to be restored to the area. Their power is fading, and they do not know how they could not turn away the dragon's wrath. So they decide to do it the only thing they can do: the hags set their traps, prepare their evil mischiefs, and wait for the next strong visitors coming to their land. You are just the strong creatures who shall cross the old lake and collect the last scraps of magic left in the shallow waters. Key Features:

- Learn the history of the half-blood hags, their traps, and their plans.
- Discover the influence of the

magic on the new-world and the Ice Age in detail. • Find your way through the swamp and its inhabitants. • Encounter the traps laid by the half-blood hags. • Open the tomb of Mocawe from the Ice Age and conquer the treasures it holds. • Find the way of the hut of Half-Blood Hag and fight against the half-blood hags and other dangerous creatures. • Show the hag your full force and overcome all the traps! • Discover the island of Ukaa and conquer its treasures. • Do not leave the swamp without either the amulet or the hat and the survival knife! • All of the encounters can be chosen if you like, so you can play it just as you like it. VIP: New Books, New Monsters, New Objects, New Spells. Every year we have a collection of the new books and monsters for you. With the first book: Thedas Book of Galth and Arks, the next books: The Avatar: Legend of the Nine and The Mists of Niflhel, and the new monsters in the Forgotten Artifacts: would say that your images are a cool use of HDR. I like them a lot. But I'm always left wondering - where was the camera. Where were you? d41b202975
