You can enjoy the game with friends regardless of experience and skill. ● Duel Features ● The player who obtains the symbol and bar at the same time wins. Double the match number when the bar becomes 20. ● Card Decks ● A deck of cards is included as standard equipment. ♦ Cards 2 additional cards that also contain symbols will be added. ♦ Types of Cards A card will have 10 different symbols in total. Six of them are used for the deck, but four symbols can be used for the special card. If you win the tournament with your special card you will receive 10,000 gold. (Silver Fox card set) (The set contains three cards only, but you will receive all five in the final sale.) Hi folks, have been a fan of Dark Souls for a while now, am I right in thinking this is the "original" version of the game? I got it off the PS store yesterday, did not really know what to expect. Played about an hour of it, and it did not leave me feeling very impressed with it. The whole concept of trying to survive after falling to the ground gets a little old after a few hours, especially because of the lack of any kind of enemy feedback. There are no monsters to fight, only reapers to avoid, and other things that cause you to die. The maps are not interesting, either, as it seems very well spaced out to me, and while being in one place for a while you might be teleported to another area you never saw before. Overall, it is a good game, in theory, but didn't really have anything that hooked me like a proper Dark Souls game should. I am willing to give it one more chance, but right now, I'm afraid it does not have the ingredients it needs to become a truly great game. Mozilla Firefox has disappeared from my desktop. Theres nothing there but a few files in and infact I cant even find my profile. Theres nothing there for
