Hello. First of all, my name is Dalibor. I am very much into music and wanted to share it with the community. I am playing on the game VolticPistol and i want to share the two songs i made with VolticPistol music. One is the end of the first world and one is the end of the final world. So, please take your time listening and enjoy. Music from VolticPistol: The end of the first world :

Features Key:

Adventure gameplay with dozens of weapons, jeeps, and missions
A ludicrous number of playable characters with extreme variations in powers and abilities

Mutate into a special breed of creature that matches your playstyle
Play cooperatively online or tackle the universe's deadliest challenges alone

The Good

- Even with a meager follow of players, the infrastructure of the EU4 servers proves resilient: daily downtime of under 1 hour.
- There are creative gameplay options for every faction at every decision point in the game.
- The AI has a few kinks to work out, but so do high-level players.

The Bad

- The game underperforms as soon as you take an aggressive stance.
- Co-op play suffers from communication issues.
- The initial learning curve is very steep: after a few sessions of hours, you find yourself snowed under enemy fire.
- Having no factions or diplomacy interaction is a total handicap and the solution is feeble.
- The biggest thing wrong is lack of communication between players.

The Bottom Line

- A fun time can be had with Lost Squad if you're patient and don't mind missing out on the regular load times, chat flow, and limited co-op play.
- There are quite a few missions and their DNA is diverse enough to keep things fresh.
- A ton of content to explore when playing the game solo

Fantasy Grounds - En5ider: Its Alive (5E) En5ider on twitter: twitter.com/SucksGaming En5ider on facebook: facebook.com/Level-10-LLC En5ider Website: First of all, thank you for taking the time to read my blog. I hope you find it both interesting and helpful. I did enjoy writing and creating art for games but after an extensive tour with Garmin and CFOA I wasn't willing to end up with a dayjob making shoes in the winter like my one job offers which is a shame because I was really looking forward to painting and drawing my own little gargoyle and with the help of Storm King's Thunder I was sure to be in the running for some cool art projects soon.But you don't want to hear that yet we are almost there!! It is with a very heavy heart that I announce that En5ider will be shutting down operations on May 1st. We have many products on sale

including items from our friends at the Modding and Beyond line. If you would like to get some of these out of our hair it is all yours. I have put up a price list on the website but most are even cheaper off the brick and mortar vendors. If you would like to purchase something let me know, I will ship it for you. I am sure other vendors will be happy to sell for a reasonable price if you can't take the risk of traveling to my house and being fleeced. I will also be setting up a sale of 5e products. Prior to closing operations I am working with some friends to team up with and finish some homebrew games that I had sitting around from the days of WoD.It was a very difficult decision to make, it has been great to see the game we made see the light of day, I have been having a blast creating and playing it and we have many new fans who also love it. But, you know, Time is just a fleeting thing.It is with a heavy heart that I must force my company to cease all operations today. I don't know what may come, some investor who is looking to pour millions into the next big MMO and for you and I to make a living off our products. For there is no greater way to hurt you than to make your creations worthless, I hate that
