El documento se crea en Base64 mientras que el siguiente es la representación directa del documento que está montando en base64: // Raw representation of the generated PDF document: `var pdfData = $('#document')[0].outerHTML; var data = window.atob(pdfData); var base64Data = window.btoa(data); $('#document').html('The PDF document data is "' + base64Data + '"');` Sample text Q: Upgrade Node.js on server with passenger I have a server that I run with passenger. The last version of Node.js that I installed was 2.6.4. I installed NVM to have a version of Node.js that I would control. I see that there is a major release between 2.6.4 and 2.6.9. Should I upgrade to the latest version or should I continue with 2.6.4? (2.6.4 is the previous version that I installed) A: It is better to choose the latest available version in NVM. Otherwise, you may have to restart your app process every time a new version gets released.
