The Crop tool The Crop tool lets you crop and resize an image in one fast move. Use the Crop tool to create a rectangular or elliptical crop of an image. You can also use the Crop tool to adjust the crop borders. To use the Crop tool, choose File⇒Crop, and then select the crop size and crop handles. To crop a JPEG image, select the Crop tool from the Tools panel and then choose the Edit drop-down menu in the Crop box, select Crop, and then choose a crop size and crop type (see the nearby sidebar). To change the size of the image you're cropping, just drag the four corner handles, as shown in Figure 8-1. By default, the x-position and y-position represent the upper-left corner and lower-right corner of the crop box. You can also drag the left, right, top, or bottom edge handles to resize the crop box. FIGURE 8-1: Use the Crop tool to resize an image. You can use the Crop tool to add or remove crop handles to define the crop box. Choose the Options button, shown in the margin, to open the Crop Settings dialog box, shown in Figure 8-2. In this dialog box, you can set the following crop-related options: * **Region:** Choose which areas of the image are to be included in the crop. Selecting the Auto option lets Photoshop select the region for you based on the area of the image that's currently selected. * **Crop handles:** Choose the number and type of handles

Faith It is not you that have loved me, but I have loved you. For this reason, I have stretched out my hands to you, for you are in me, and I in you. And since I have called you, you must go to one another. I have given you the power to go out in the name of the Son of Man. Now I turn to faith, but faith without works is dead. (James 2:23-24) In Christ we are changed. We have received the power to live a new life of triumph and fulfillment. In Christ, we are filled with joy, and our source of joy is the power we are given to go out in His name. We can share that joy with others in the way we live, because we have been granted the power to go out in His name. Thank God that you are a child of God, adopted as His son. (1 John 3:1) We love God because he first loved us, and sent his Son to make our reconciliation possible. Because God loves us, we can love each other. If our love is not first for God, it will be empty of meaning. If our love is first for each other, it will overflow in service to others. If our love is not first for God, it will be empty of meaning. If our love is first for each other, it will overflow in service to others.A fresh and easy set of finger foods that are perfect for any celebration. Association between a polymorphism in the CYP19 (aromatase) gene and circulating androgens in osteoporotic women. To determine whether a polymorphism in the CYP19 gene influences plasma levels of estradiol and testosterone in osteoporotic women. Single-step procedure and a group of 113 postmenopausal women suffering from osteoporosis. Fifty-four women homozygous for the high-expressing CYP19 A allele and 59 women homozygous for the low-expressing C allele. Gene-gene interactions between CYP19 genotype and 25-hydroxyvitamin D status were also analyzed. Two main findings are reported. First, CYP19 A allele is associated with a statistically significant reduction in plasma testosterone levels. Second, the concentration of testosterone was correlated with plasma calcium and bone mineral density (BMD), and it decreased when BMD decreased. Finally, this effect disappeared when CYP19 genotype was taken into account. No effect of CYP19 genotype was observed on estradiol levels. These data support the importance of genetic factors in the development and clinical expression of osteoporosis.Mean central venous pressure and serum insulin and c-peptide levels in the assessment of the intravascular volume status in healthy dogs. To determine the reference intervals for mean central venous pressure (mCVP) and serum insulin and c-peptide concentrations and to assess the intravascular volume status in dogs. Prospective study. Animals-35 client-owned clinically healthy adult dogs of various breeds and different sizes. Intravenous fluid therapy was performed at each dog's bedside to obtain a fluid balance and a weight change of ≤ 1 kg (diuretic protocol). The mCVP was measured and blood samples were collected after approximately 20 minutes of waiting for the intravascular volume to reach a steady state. The mCVP and serum insulin and c-peptide concentrations were positively correlated with fluid balance in all dogs (rs ≥ 0.40, P
