Microsoft Office 2016 Excel 2016, 3rd party software like Open Office Calc, Google Docs, Mozilla Firefox, Safari etc.... are better alternatives to Excel with or without Office 2016. But some people still love Excel or want the maximum experience. In that case, you may want to use the Microsoft Office 2016 Excel 2016. You may ask why not use the applications mentioned above. The answer is simple. Microsoft Office 2016 makes every Excel spread sheet, PowerPoint presentation or Word document a royal mess. Not only does it impose the same quirks as the older versions, all Microsoft Office 2016 spread sheets, PowerPoint presentations and Word documents use the same look and feel, make the same mistakes etc. In contrast, the same document made in the older versions of Excel or Word or PowerPoint is 100% intuitive. They look like they were made by a professional user. Or in other words, they are designed and intended to be used by the computer user. Microsoft Office 2016 falls between the hands for some reason. And most users are better off using an alternative. For example, Microsoft Word 2016 uses a new design that is really ugly. I hope that the design will change in future releases. 6.0 Microsoft Office 2016 Works 2016 The problem is Microsoft Office 2016 Office Assistant 2016 and Excel 2016 Settings. There are
