This game is set in the distant future, where the roads have been connected. Tapping into your StarDrive to travel quickly across the galaxy is now as easy as arriving in the parking lot and selecting a particular destination. As the galaxy slowly converges, the remaining space between human occupied planets has become a wild frontier. This new frontier threatens to become another battleground. Vast amounts of resources are left abandoned by the scavengers, and now these planets are being fought over by the space factions. Human space has developed into an unstable system where you can now expect piracy, gangs and even private military corporations to snatch your hard earned credits. Join me, the galaxy's most dangerous bounty hunter and driver as I set out to recover stolen and abandoned property from the various factions of the galaxy. StarDrive - The ultimate driving simulator game. No more looking at a screen while your car drives for you, just look up, at the stars, and have your car do all the work. Multiplayer - Racing all around the galaxy in your STARDRIVE. Build up your reputation as the top bounty hunter in the galaxy by becoming the biggest cash cow. Or enjoy the race all by yourself. Features: ◦TREACHEROUS UNIVERSE: - Explore the Endless Continents - Meet various factions in the wild frontier, including pirates, criminals, rogue AI's and so much more! ◦DYNAMIC TIME LINE EVENTS: - You will visit Locations Unique for every Event - Weather, time of day, faction, finance and many other dynamic factors contribute to the events ◦FUTURE EVENT: - Become the Top Bounty Hunter and drive for your Fortune ◦LIFELESS VALUE EVENTS: - Spend some time in life and money with powerful factions ◦AUTOMATIC RACING ON MILLIONS OF LIVES: - The more money you make, the more lives you get. Obviously a good incentive to collect your cash! ◦A LIVING, BREATHING UNIVERSE: - Customize your STARDRIVE with hundreds of parts to make it look just like you want. - Some StarDrives are even capable of driving on the roads! ◦MULTIPLAYER RACING: - Play with up to 2 friends using local or internet multiplayer. - Set up your own tournaments and ladder to climb the ranks ◦RACING WITH FRIENDS: - The dynamic AI of the game is able to detect and

What's new:

Simulator (visit) Simulation of the Earth's surface. Simp is an online and cost-free application included for those interested in the challenge of learning. The Simp Simulator tests your ability to use the data models and the numerical methods for the use of Simp. You need to know how the data is modeled and where they are stored in order to understand the models. Also, you need to learn to use the numerical methods for solving the singularities by themselves and in order to reach the optional problem types. The application is suitable for anyone who studies at the undergraduate and graduate levels or for professionals who use Finite Element and Finite Volume methods. The following features have been incorporated to make the simulation more accessible and more interesting to study: The download of the data and model's data are offered as zip in several formats in order for you to get the appropriate one for your purpose. You can create a project in Simp that stores all the data you need and your project automatically in the most convenient way. Projects can be saved and also later retrieved to amend at any time. There

is a complete visualization of the solution and a dialogue box with the data is provided, in which you can view information on the solution at any time and update it. You can work with windows that can be placed at any angle in space and you can specify for the simulator the direction and size of the panels. You can view the tutorials as they are uploaded to your project or stored online in the offline mode to work with them at any time. Practicing 8 optional problem types, using different discretization models, with isotropy, one of the most characteristics of numerical methods Analyzing the solution as well as its quality The course of this part requires 90 hours of practice time that will be divided into two parts of 45 hours each. Below you find the start dates of the two parts. Part 1: 27/03-03/10 Part 2: 23/10-29/02 Maximum user number per project: 4 Most important features of Simp Simulator OnlySimps - a new online resource for those interested in learning Mathematics and Physics dealing with Geography, Hydrology, and Oceanography in a simulator that can be studied online and from any place and all without the need of a computer being connected to the internet. Simp is an online and cost-free application
