Bring drawing parts into the workspace and insert parts in any order to create new models. Use snap-to and autocorrect to easily create a single model from multiple parts (video: 4:25 min.) Add additional contour lines with the Contour brush tool. Turn contour lines into additional graticules to easily view how the outline of a drawing relates to the edge of a surface (video: 3:43 min.) Create a box or an outline for the entire drawing without creating individual objects. Create an outline using the new outline mode and then edit the outline for additional details or rotate the box for a better fit to the surface (video: 2:51 min.) Rapidly edit data in graphs, tables, and web pages using Autoscr. Navigate to the page and click the Autoscr button to view all data in one place.
