Be 'informed' before you buy into the 'slippery'- non refundable- poorly coded & 1GB++ Nero 9. Besides being an install nightmare if it does install the results can even be more disenheartening as several of the applications simply do not work at all... Check out the 'truth' as Mulder and Scully would say it's

right under Nero's nose
their own forums for how
BAD Nero 9 really is-- Be
smart and go with the
FREE ImgBurn for all of
your burning needs.
SapphireX Provided link
took to Nero.com
website where the ONLY
DOWNLOADABLE trial
release is the 11.0.10700
one (and its not the
complete suite but a
small web installer, as per

these days trend).
Personally I'd like FF BN
be more accurate wz
release #s and that all
software pieces were
available both as web and
standalone installers
(IMHO if we download BD
via Torrent sites / direct
downloads, MS Windows
OS from MicroSoft why
cant we download a
standalone installer as
well). Thats all up to you

folks. Cheers. Ripping CD/DVD data to digital music players, hand-held media players, or computer systems can be quite challenging, since your CD- or DVD-ROM/writer is most likely a slower and less powerful drive than that of your CD/DVD player. Nero Burning ROM Elite features a track-based library, as well as a

collection of advanced file converters that will automatically handle the impossible task of converting audio files between different formats. Nero Burning ROM Elite also lets you rip all your CD and DVD tracks to Mp3 format in batch, with the ability to reorder tracks and include or exclude certain tracks. With Nero Burning ROM

Elite, you can also rip from the CD/DVD-ROM or from the CD/DVD-writer directly to the media (hard disk drive or memory card) of your audio player, portable device, smartphone or computer. And you can create a playlist, with the contents of the CD/DVD sorted by title, genre, composer, artist, or various other categories.

Ripping with Nero Burning ROM Elite is easy - just select the type of CD/DVD media, select your audio file format, and your audio file source. The rest is handled automatically.
