FillerAutomator Pro is a powerful, fast and easy-to-use image adjustment tool. So be sure to use this software and the dsf filecreator. Q: access class member variable from another class member How to access one class member variable from another class member. For eg I have a class A A a; Now in another class B, I want to do something with the variable a, ie. increment it using another class variable value. How to access it? A: You could pass the object to the class which can set/get the value, like this: ClassA a; ClassB b = new ClassB(); b.setValue(a); b.doSomething(a); Then in class B: private void setValue(Object o) { o.increment(); } private void doSomething(Object o) { ... } // Collection myfiles=rootFolder.getCollection(); for(int j=0;j < myfiles.Count;j++) { 79a2804d6b
