Category:Al-Jamia Category:Jamia Millia IslamiaControl of the Two-State Dynamics of an Electron-Assisted Ultrafast Charge Transfer Process. A theoretical study of an electron-assisted ultrafast charge transfer (ECCT) process that involves a system of two subsystems is presented. The driving force of the charge transfer, the electron-affinity of one of the subsystems, is governed by the ratio of the dielectric constants and the overlap of the charge distribution of the donor and acceptor. As we show, the ECCT process is in essence a two-state system. We propose a simple scheme for the control of the ECCT dynamics. We discuss three methods for obtaining the desired ECCT efficiency. The first two methods, which make use of structural changes, are often impractical from an experimental point of view and are not suitable for asymmetric charge transfer. To overcome this problem, we introduce a third method that makes use of the relative energetics of the states. The results of the theoretical study are benchmarked by ECCT experiments reported in the literature. We see the potential for further optimization and scalability of the present method, which is based on the eigenvector analysis of the system's relevant eigenvectors and eigenvalues.Q: Horizontal scrollable recyclerview not working I have three RecyclerViews in each of the fragment. These recyclerviews are horizontal scrollable but I have problem with one of the recyclerviews. Scenario I have an imageview in one of the recyclerviews and some description about the image in the other recyclerviews. Now when I select the image in the recyclerview and click on the description which is also in a recyclerview, I want to scroll down to that description but it does not do that. The selected image and other recyclerview are below the description in the recyclerview. private RecyclerView recyclerview; private RecyclerView recyclerview2; private RecyclerView recyclerview3; private String imageurl; private String text; @Nullable @Override public View onCreateView(@NonNull LayoutInflater inflater, @Nullable ViewGroup container, @Nullable Bundle savedInstanceState) { View view = inflater.inflate(R.layout
