In fact, there is a lot of new stuff to play with in this application, but there are also some existing tools and features that have been enhanced. One of the more popular additions is the brand new ACR features. There is a new camera raw editor for Adobe's Raw developer tool, which will allow photographers to bring adjustments and image adjustments into their raw JPEG files. Additionally, the developer kit tools have been updated as well, including a new crop tool that can be used to crop an image without loosing any detail, and even on motion video without re-encoding. There are still a lot of little additions and upgrades that will make the software easier to use. One of the major ones is the ability to customize keyboard shortcuts by dragging the icon into the shortcut bar and setting them up. Another is that Lightroom knows when it is being used in mock mode and will automatically disable itself from ready mode. Not all the changes that are included in the update come without a price. For example, additional updates for "PSD" files have been added. Quite frankly, it is nice to know that Adobe adds perks and enhancements for the most often revised file type of the entire software. As a designer, I personally prefer the 500 dpi "final" PCS file over the 100 dpi actual Photoshop and Sketch files. But that is just me.

Now today is obviously not the time to go off and start using the Creative Cloud app. However, the update to Photoshop on the desktop scene does mark a very significant milestone in the effort to make the desktop version of this application more powerful and desirable.

In 2014, Adobe expanded its Creative Cloud platform to help you work across multiple devices. You can now work on your creations and sync them across multiple devices and different platforms. To make the web integration of Photoshop as seamless as possible, the company also decided to create a web version of Photoshop. Now you can run Photoshop the same way you would a desktop version of Photoshop. The idea of running software as complex as Photoshop directly in the browser would have been hard to imagine just a few years ago. However, by using various new web technologies, Adobe has now brought a public beta of Photoshop to the web. (If you prefer watching over reading, this article is also available as a video.) Released in August 2016, Photoshop is available as a standalone application for Windows, macOS, iOS, and Android. It also works with the Chrome browser, but is locked down for running on Chrome. The software is also available with Creative Cloud membership or as a standalone application purchase. The download size of Photoshop is approximately

600MB (or larger depending on the version). While you and your team still have access to the CS6 version of Photoshop, which is a winner of every design award in history (PSD Photoshop Lightroom, The world's most loved, and powerful editing and design software, v.5), we are in awe of how creative professionals and consumers are using Photoshop and Adobe products to explore and express the latest tools, design innovations and content. Our vision for Photoshop is to provide you with the most powerful creative experience anywhere, anytime – to creatively enable your business, your world, your life.
