Q: Exponentially Generated Random Number I have an input string which has to be unique, but with a low probability of repeating. The input string is like this: "word0\_word1,word2\_word3,word4\_word5". for example: 00001124421 I want to generate  $10^6$  random numbers between 0001,0011 and convert the input string to a number. For example: 00011000011 I hope the exponential is in my question. I used the following formula but I wonder if there is a better solution.

```
private static int GenerateRandomNumbers(int maxNumber){ int answer = 0; Random random = new Random(); while
