Once the installation is complete, you need to locate the installation.exe file and run it. Then, you need to locate the patch file and copy it to your computer. The patch file is usually available online, and it is used to unlock the full version of the software. Once the patch file is copied to your computer, it must be opened and the instructions on the screen must be followed. After the patch file is run, the software is cracked and ready to use. Just remember, cracking software is illegal and the software may be taken away from you if you are caught. At your own risk, crack Adobe Photoshop!

But it did, it gathered a following, and it was becoming something more. I stopped working for a while, and took the time off to work on it, and called it "blog and microsite empire".
